Education

University of Maryland

Aug. 2022 – May 2025

Bachelor of Science in Computer Science; Presidential Scholar; GPA: 3.8/4

College Park, MD

Activities: Startup Shell, Alpha Kappa Psi, Maryland Mauj, Hack4Impact, Young Jains of America, Conrad Challenge

Relevant Coursework: Adv. Data Structures, Computer Networks, Artificial Intelligence, Robotics, Mobile App Dev, Software Engineering

Skills Section

Python, Java, C, React, HTML/CSS, JavaScript, SQL, Swift, Flutter, TypeScript, Go, Ruby, REST, Kubernetes, Docker, AWS, Flask, Linux, Jenkins, DynamoDB, GitHub, JUnit

Honors and Awards

Taco Bell Live Más Scholarship Recipient - top 1.5%, Global Conrad Innovation Challenge Winner, 2x FIRST Robotics World Championship, HackTJ – Best Hack Winner, National Academic Decathlon Speech Champion

Experience

Capital One

June 2024 – August 2024

Associate Product Management Intern

McLean, VA

- Reduced 16.3k hrs/year of delay by streamlining and automating the namespace quota request experience on the EMP
- Shipped user-centric MVP to closed beta with new Cradle API, DynamoDB, and UI, with a roadmap for 98% migration
- Integrated 2 new LLMs to GenAI Sandbox platform to enable additional use cases for teams across the enterprise

Workday, Inc

May 2023 – August 2023

Machine Learning Intern

Pleasanton, CA

- Increased anomaly capture by 8% in Splunk security logs by building an Isolation Forest ML model and training it
- Achieved 92% model accuracy with 9 base features engineered from entity relationships and user behavior experiments
- Utilized AWS services to ingest and process data into OCSF and Parquet format reducing verification time by 20%

Hack4Impact

September 2022 – Jan 2023

Software Engineer Intern

Remote

- Developed an event organizing tool for 500+ members of a non-profit client using React, Express, Make, and Twilio
- Decreased user overhead by 60% through integrated Airtable fetches, automated workflows, and local push notifications
- Raised total user adoption to 350+ members by improving mobile responsiveness and delivery optimization for events

Leadership / Extracurricular

Startup Shell

June 2023 – June 2024

Director of Partnerships

University of Maryland

- Grew endowment fund by \$50k and raised \$20k in operational funds for 60+ ventures in the student-run incubator
- Negotiated key partnerships with Red Bull, Jump Trading, Latham & Watkins, Contrary, M&T Bank, and more
- Maintained relationships with critical stakeholders including venture capital firms, university partners, and alumni

Fair Lakes Youth Association

June 2020 – Present

Founder

- Started a 501(c)(3) non-profit to bring robotics opportunities to Title 1 schools and under-privileged areas international
- Ran 50+ workshops on CAD, programming, robotics, and reached 1.2k+ students, 11 schools, and 4 countries to date
- Lobbied representatives on Capital Hill to pass the Christa McAuliffe Coin Act and to get robotics as a varsity sport

Projects

Terpiez (Pokemon Go) Mobile App | Flutter, Dart, Redis, JSON

April 2024

- Developed a cross platform app to "capture" creatures around campus with use of shared preferences, maps, background services, persisted data, notifications and more

Opioid Overdose Prevention System (Patent Pending) | JavaScript, Kotlin, Android Studio

2021-Present

- Engineered a novel device aimed to prevent opioid addiction and overdose with a secure pill dispenser, health band, and smartphone app.

Spotify Notes Web App | MongoDB, Express, React, Node

October 2022

- Built a web app with React, Spotify API, and Firebase that pulls playlists and enables you to share notes about your favorite songs and leave comments for your friends to see - makin music social
